NIKSHA INDUSTRIES

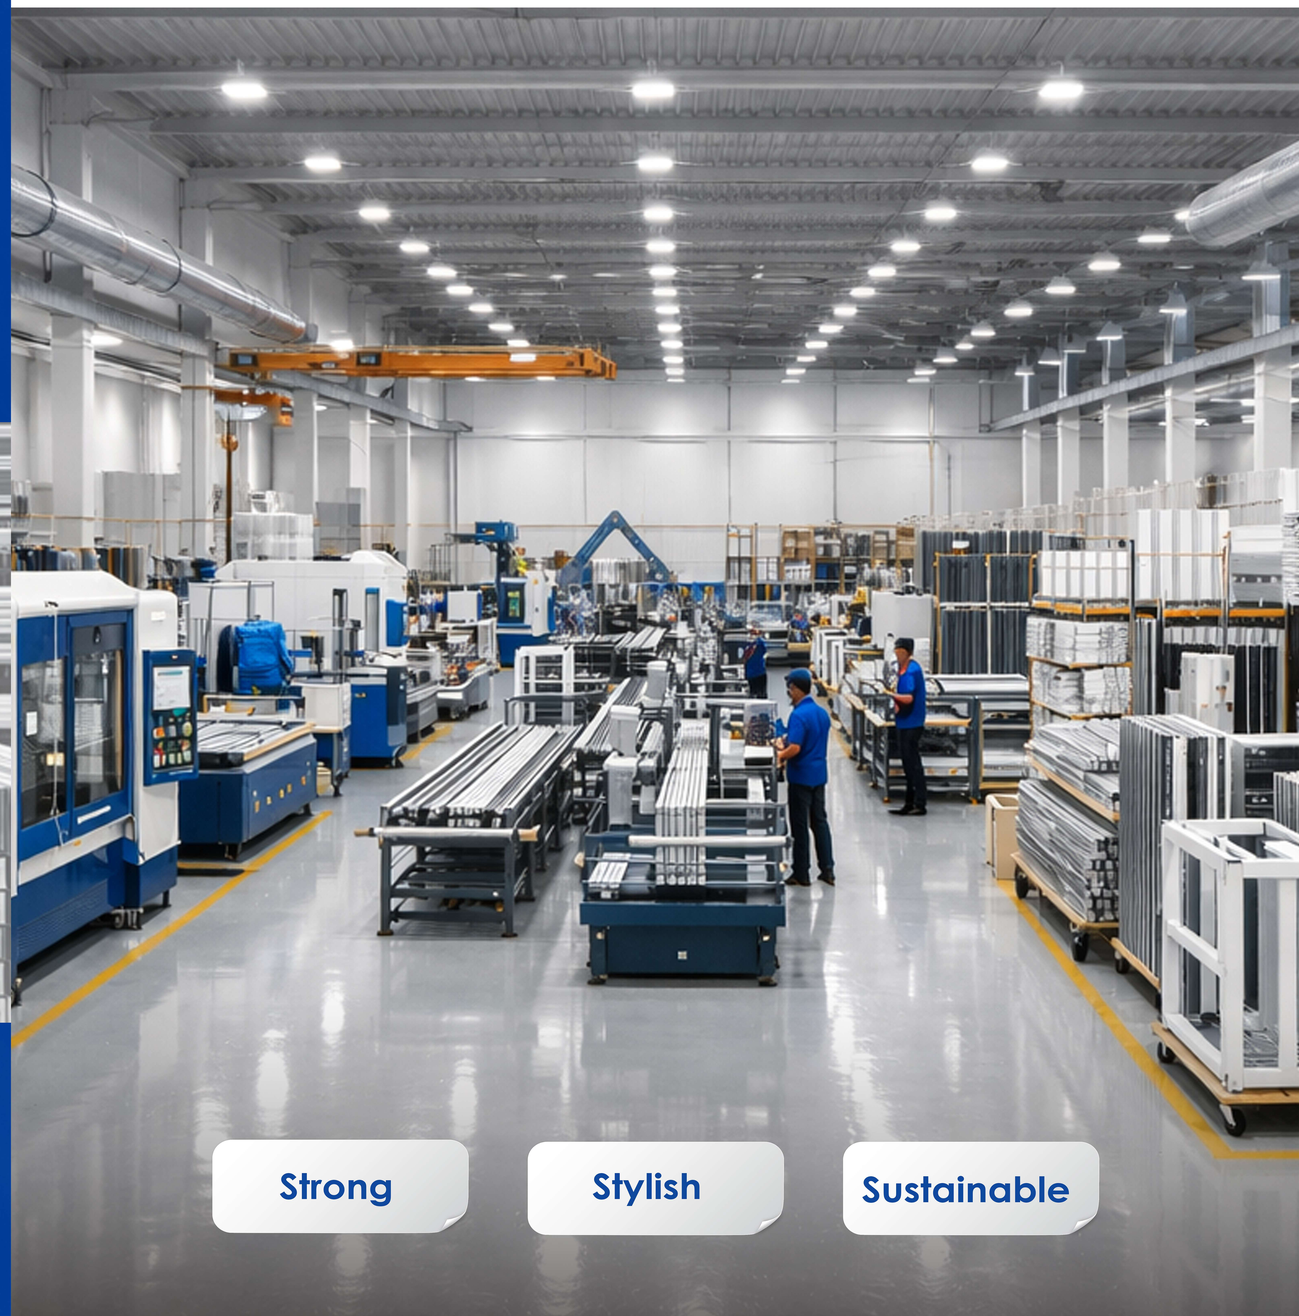
UPVC & ALUMINIUM SYSTEMS

Engineered for Modern Living



Strong

Stylish

Sustainable

FOUNDER'S NOTE

Niksha Industries was born from a simple belief that the spaces we live and work in should be strong, stylish, and sustainable. As construction evolved, I saw the need for materials that could offer durability without damaging nature, and design without compromising performance. That vision led to Niksha, a brand built on innovation, integrity, and engineering discipline, focused on delivering UPVC and aluminium solutions that truly serve modern living.

BUILT BY ENGINEERS. POWERED BY A SKILLED TEAM.

At Niksha Industries, our strength comes from our people.
From leadership to technicians, every member works with one goal
— **quality without compromise.**

HARDWARE & EDGE QUALITY

Premium Hardware. Perfect Finishing. Engineered Edges.

At Niksha Industries, quality is visible not only in materials — but in the edges, joints, and finishing details that most people ignore.

UPVC EDGE QUALITY

Our UPVC systems are engineered for long-term performance and comfort.

Key Features

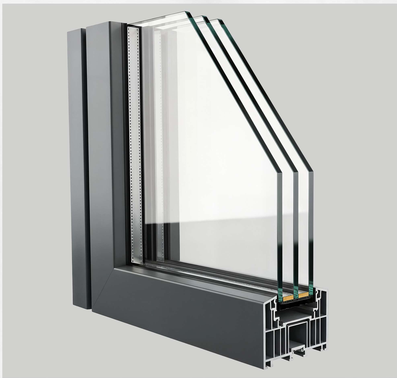
- Smooth and uniform edge finishing
- Strong fusion-welded joints
- No sharp corners or gaps
- Excellent sealing for dust, water & noise
- Better thermal & sound insulation
- Clean appearance from inside and outside

Result

- Silent operation
- Zero leakage
- Long-lasting performance

ALUMINIUM EDGE QUALITY

Our aluminium systems are designed with precision engineering and premium finishing standards, suitable for modern architecture.



Key Features

- Clean-cut, precision-finished aluminium edges
- Perfect alignment at joints and corners
- No visible rough cuts or uneven gaps
- High-quality powder coating / anodized finish
- Scratch-resistant and fade-resistant surface
- Strong corner joints for structural stability

Result

- Premium look
- High structural strength
- Long-lasting finish
- Zero compromise on safety
